EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Applicants' Representative, Richard Chin, on May 5, 2005.

The application has been amended as follows:

Claim 1, line 4, "after "comprising", the following phrase has been added:

-- the coated metal oxide particle --.

Claim 6, line 2, "one or more types" has been deleted.

Claim 14, last line, before "metal", -- total – has been inserted;

last line, after "and" – in – has been inserted.

End of Amendment.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: None of the prior art references of record, singly or in combination, teach a polymer composite containing silicone/fluorine-coated metal oxide and obtained by polymerization vinyl monomer having specific solubility parameter with a crosslinking agent as claimed.

The Obe reference (US 3,716,505) teaches a process of polymerization of vinyl monomer utilizing metal oxide as a dispersing agent for the vinyl monomer, but the metal

oxide is not as one of the main components to form a polymer composite as required in the instant claims. In addition, the solubility parameter of the vinyl monomer is not taught, neither is the presence of a crosslinking agent.

The Kang reference (US 6,132,861) teaches a reflective coating composition comprising a fluoro/silane-coated creamer in a free radically curable binder precursor, but it does not teach that the binder precursor be a vinyl monomer and at least 25wt% of the monomer have a solubility parameter of less than 8.9 as claimed. As shown in the comparative examples 1 and 2, polymer composites comprising polymers from a vinyl monomer with solubility parameter 8.9 or larger result in inferior UV protection property.

The publications 2002-197475 and 2002-094439 fail to teach polymers from vinyl monomer with specific solubility parameter in the composite.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to H. T. Le whose telephone number is 571-272-1511. The examiner can normally be reached on 10:00 a.m. to 6:30 p.m., Mondays to Fridays.
